SE Monterta tätningen på baksidan av väggfästena. Nötta att tätningen endast passar på ett håll.

FR Installez le joint à l'arrière des supports muraux. Veuillez noter que le joint ne s'insère que dans un sens.

ES Coloque la junta en la parte posterior de los soportes de fijación mural. Tenga en cuenta que la junta solo encaja en una dirección.

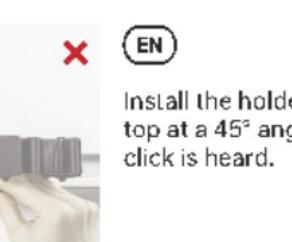

DE Coloque la plantilla sobre la parte posterior de los soportes de fijación mural. Tenga en cuenta que la junta solo encaja en una dirección.

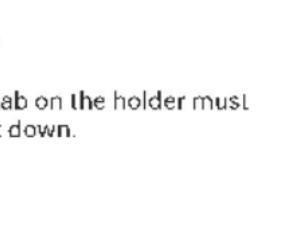

EN Fit the seal to the back of the wall brackets. Note that the seal only fits one way.

EN Place the template on the wall (see back). Use a spirit level. Mark the wall through the holes in the template.

EN Screw the wall brackets in position on the markings. Use the screws supplied (and anchors as necessary).

EN Install the rail along the wall brackets at its lower edge. A click will be heard when the bracket is properly closed.

EN Close the wall bracket at its lower edge. A click will be heard when the bracket is properly closed.

EN To release the rail, first click it out at the lower edge and then remove it.

EN Remove all tools before removing the rail.
